

INO chef 10 CLEANER FOR BAKED-ON CARBON AND FAT

INO-CH10-4

VALUE ADDED

- Quickly removes baked-on carbon and fat from griddles, deep fryer, ovens, barbecues and grills.
- Leaves no odour.

APPLICATIONS

- Before cleaning, preheat to 80°C then shut off before applying INO chef 10.
- GRIDDLES:** Mix one part INO chef 10 and one part water and apply liberally using a cloth or brush. Let the solution work for 5 - 15 minutes. Wipe clean using a clean cloth. Rinse well with potable water. Wipe dry. Apply a thin coat of oil to prevent surface from rusting.
- COMMERCIAL OVENS:** Use INO chef 10 undiluted. Using a brush. Apply cleaner directly to walls, racks, burner and glass. Let the cleaner work 5 – 15 minutes. Stubborn areas may need scrubbing with a soft nylon pad. Rinse well with potable water. Wipe dry.
- DEEP FRYERS:** Scrape off or hose down to remove excess grease. Fill up to about 10 cm (4 inches) from top with cold water. Add one part INO chef 10 to 40 parts water. Boil the solution for 30 minutes. Scrub the greasy residue while still warm. Rinse well with potable water. Wipe dry.

DILUTION RATE

INO chef 10 is an extremely effective cleaner for baked-on carbon and fat from griddles, deep fryers, ovens, barbecues and grills. It leaves no odour.
