

VALUE ADDED

- . Safe and easy to use
- . Effective, fast melting power
- . Custom blended for maximum salt power
- . The blue crystals are easy to see and facilitate uniform application of the product at each spreading
- . Absorbs sunlight
- . The ideal solution when immediate surroundings are sensitive to corrosion problems

Artic Volcano melts ice and glazed frost at temperatures as low as -29°C . Following a storm, spread Artic Volcano over the affected area. Use approximately 0.14 to 0.28 kg/m^2 and spread the ice melter evenly. Allow a few minutes for the salt crystals to melt accumulated snow and ice. Remove slush with a shovel or scraper. Do not pile on vegetation. Reapply as needed.

SPECIFICATIONS

Color	Blue
Weight	20 kg
